PROFESSIONAL SUMMARY

MERN Stack Developer with 1+ year of hands-on experience designing and shipping production-grade web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in Next.js SSR/SSG, REST API integration, Supabase authentication and database management, and deploying applications on Render. Writes clean, maintainable, scalable code while collaborating with designers, project managers, and senior engineers. Eager to take ownership, continuously learn, and contribute meaningfully from day one in a remote, agile environment.

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, React.js, Node.js **Frontend:** Next.js (SSR/SSG), Tailwind CSS, Redux, Zustand, Context API, HTML5, CSS3
Backend & Database: Supabase (auth, storage, database, APIs), PostgreSQL, MySQL, Django, FastAPI
Deployment & DevOps: Render, Vercel, Docker, Git, GitHub version control workflows
Languages & Testing: JavaScript (ES6+), TypeScript, Jest, React Testing Library
Other: REST API design and integration, third-party API and AI integrations, responsive web design, performance optimization, Agile methodologies, code reviews

PROFESSIONAL EXPERIENCE

MERN Stack Developer Mar 2025 – Present
Swiss Digitech Solutions LLP Chandigarh

- Developed and maintained full-stack web applications using React.js, Node.js, Express.js, and MongoDB, delivering end-to-end features across multiple client-facing products.
- Constructed responsive, user-friendly interfaces with React.js and Next.js by converting Figma designs into reusable, scalable component architectures with a strong attention to detail.
- Integrated third-party services and REST APIs with robust validation, structured error handling, and predictable data flow across frontend and backend layers.
- Deployed and monitored applications on Render and Vercel, resolving environment-specific issues to maintain stable, performant production releases.
- Participated in code reviews, adopted Git workflows and Agile sprints, and authored clean, well-documented code consistent with established team standards.
- Troubleshoot and optimized application performance via code-splitting, lazy loading, and lifecycle tuning, eliminating unnecessary re-renders across critical modules.

PROJECTS

PyCheck — Finance Dashboard | *React.js, Next.js, Node.js, Supabase, PostgreSQL* | py-check.vercel.app 2024

- Architected a full-stack finance platform leveraging Supabase for authentication, database management, storage, and API services, enabling secure multi-user access at scale.
- Utilized Next.js server-side rendering to accelerate initial page load and strengthen SEO, paired with Context API state management for fluid client-side filtering and aggregation.
- Designed and consumed REST APIs with low-latency payloads, ensuring reliable communication between the React frontend and Node.js-backed services.

Payroll Robot — Payroll Platform | *React.js, Node.js, Express.js, FastAPI, PostgreSQL* | prcore.payrollrobot.ai 2025

- Engineered a scalable payroll management UI with MongoDB-backed Node.js services, supporting pagination, advanced filtering, and real-time data updates for enterprise-scale records.
- Worked alongside senior developers and project managers to uphold data consistency, automate reporting pipelines, and ship API-driven features within Agile sprint cycles.
- Enforced responsive web design standards and conducted cross-browser verification to deliver a uniform experience across diverse devices and screen resolutions.

EDUCATION

Master of Computer Applications (MCA) 2023 – 2025
Chandigarh University

Bachelor of Computer Applications (BCA) 2020 – 2023
D.A.V College, C.C.S University
